

# Improving our Project

## Main Points

### Fontys ICT

Created by: Kristian Lachev - Group 03

1. Applying bug fixes to the Employee system.
2. Applying bug fixes to the Stock system.
3. Changing/Adding features to the Department system.
  - Making it so you can choose only an existing manager as Department Manager.
  - You cannot remove a Department when there are employees present inside it.
4. Adding new features to the Employee System.
  - Adding information about the employee's Fire Date.
  - Adding more information about the employee(email, address, phone number etc.)
5. Adding new features to the Stock System.
  - Adding a Minimum Amount feature to a certain stock in order to notify the user when it becomes too little.
6. Creating, adding and connecting a website to the our C# application.
7. Creating a folder that contains all the versions of our database system/UML Diagrams.
